SIMPLICITY, AUTOMATION AND EFFICIENCY

The automatic sheeters of the SMART RANGE are the excellence of Tekno Stamap in lamination. The SMART and INDUSTRIAL SMART models perfectly manage to combine the simplicity of use of the manual machine with the convenience, speed and precision of automatic touch screen programming. The AUTOSMART range represents the top for automatic dough sheeters.

The programmable touch screen control panel allows you to store up to 50 programs. With the addition of the automatic flour duster and the automatic winder (both optional for SMART and INDUSTRIAL SMART), the programming will allow

you to automate the entire process for maximum efficiency and speed and the best precision that can be obtained. Our touch screen module also allows you to work in manual or semi-automatic mode, for fast and occasional processing.

The AUTOSMART 123 range, with the 123 mm diameter rolling cylinders, is the ideal machine for laminating very hard doughs even up to 0.2 mm thick without any problem, as the reinforcements to the structure and sides allow maximum precision even with products that are particularly difficult to sheet and laminate.

Ideal for leafing through even reduced thickness of pasta in automatic mode
